

Department of the Navy

TECHNOLOGY ACCELERATION

The Department of the Navy is building its advantage through SBIR with a novel program that is simpler, faster, and more impactful. The NAVY Technology Acceleration effort will leverage small business to enable technology adoption at the pace of innovation.

NAVY Technology Acceleration topics feature:

Simpler: Cuts proposal requirements 75% – from twenty pages to five

Faster: Accelerates evaluation, selection, and payments – trims processing time by 2/3

Impactful: Enables wider range of concepts from more innovators through broader topics

Flexible: Matches pace of development using new contracting tools – awards in 30 days

Decisive: In-person demonstration of Phase I feasibility for same-day Phase II award

ACT NOW! Be the next great high-tech company to partner with the U.S. Navy. The 19.3 SBIR BAA is open with NAVY Technology Acceleration topics in artificial intelligence/machine learning, autonomy, and training technologies.
